## Some words about me

I have worked for many years as a self-employed, which has given me a great sense of responsibility and organization. Having moved to France, I left that professional past behind to work in the restaurant sector, but my constant attention to detail and commitment to the company quickly led me to become the manager of the establishment. After three years in which I was able to adapt to the new language and culture, I'm now seeking a new professional future in a field that has always been a dream for me: programming. In my free time, I work on projects using different technologies such as Arduino, Python, and others related to web development or riding my bike to change!
